

TERMS & CONDITIONS

1. Minimum order value - ₹ 15,000/- (Before Tax & Packing Forwarding)
2. CST/VAT @ 12.5% will be applicable. (For Purchase under 'C' Forms, please contact our office for details.)
Note - It is necessary to provide us with your VAT / TIN numbers (applicable for all orders)
3. PAYMENT - 100% Advance Payment is required with order.
4. DISPATCH - Goods can be expected to be dispatched within 3-5 days after we receive payment in our account, unless otherwise specified.
5. PACKING - We charge extra for Packing @ ₹ 150/- per box.
6. TRANSPORT - Transport is charged extra as per actual cost.
7. Our responsibility ceases once goods are delivered to the transporter / railways agent - Please contact us immediately in case of any delay or discrepancy in the parcels. NOTE - We do not take responsibility for handling of goods once boxes are handed over to the transporter / railways agent.
8. All Responsibility for Unloading of Goods from delivery vehicles and /or Collection of Goods from Transporters / Railways / Airport etc. lies with the buyer at all times.
9. To keep prices low and to protect the environment, almost all our pots are made from recycled plastics. Due to this, occasional pots may break in transport or in use due to rough handling. PLEASE NOTE - We DO NOT replace such pots. It is possible to make unbreakable pots, but each and every such pot will cost 50% more - it is better to accept a small percentage of breakage. Most such damaged pots are still quite useable in practice.
10. Validity - Proforma once prepared is valid for period of 10 days.

IMPORTANT NOTES

- ALL CORRESPONDENCE / ORDERS PREFERRED IN WRITING via E-MAIL: tropicannursery@gmail.com
- Hangers all in Virgin Engineering Plastic.
- This catalogue super all previous catalogue.
- All specification subject to change without notice.
- Pictures for illustration purpose only products may differ slightly.

Horticultural Supplies Co.

hosco

Since 1983

AN INTRODUCTION

Horticultural Supplies Co. made its first pots in 1980, primarily because we needed pots to grow our own plants - we were the first to produce proper plastic pots in India.

Unlike most other pot producers, we really understand plants - all our products are tested and refined under actual nursery conditions and for growing real plants. Many of our products are specially modified to work better under Indian conditions - tropical temperatures, high light levels, relatively cheap labour etc.

Some of our products are designed to optimize nursery production of plants for eg. our range of square pots that fit neatly into the Multi-Purpose trays or the Spacing Trays that form an economical, long lasting bench. Others are designed to be used to display plants to the best effect, like our Plant Containers including the Oasis Self-watering Pots, Lilypon Bowls, Athena Pots etc.

Most of our pots are made of recycled plastics. Using select materials, high quality U.V. stabilizers and the best pigments, we are able to give you superior products. Our Terra Cotta colour will not fade in the sun, unlike the Terra Cotta pots from most other manufacturers.

We can design pots, drippers or other plastic articles as per your design - please feel free to contact us if you need anything different in large numbers.

Please check out more details on our products, photos of products in use and technical articles on Pot Plants at www.hoscoindia.com and more about our plants at www.tropicanursery.com

Corfu Pot.

View from Inside

Integral Saucer

After inserting Integral Saucer inside Corfu Pot

INTEGRAL SAUCER

HOW IT WORKS

Hanging baskets tend to dry out rapidly. Also, excess water coming down from baskets is a nuisance. Integral-saucers covers both issues and are invisible too!

Both water and fertilizer is recycled-this helps plant growth and reduces environmental harm.

Extreme amounts of water such as rain can still escape without flooding the root ball.

"ECO- FRIENDLY"

SAVES WATER & FERTILIZER

Pots (without hangers)

Corfu Hanging Pots can also be used as regular pots without Hangers.

Oasis Self-Watering Planter

Available Colour

WT

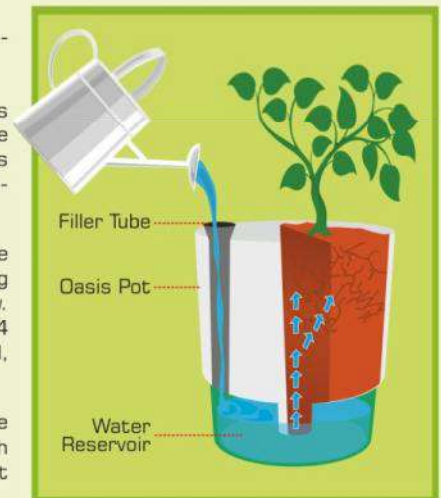

- Modern design suits all interiors
- Waters through built in reservoir to give healthy plants
- Low maintenance pot plants for indoor and balcony
- Available in two sizes

CODE	TOP DIA.	BOTTOM DIA.	HEIGHT	VOLUME
Oasis Small	10 cm	8 cm	11 cm	600 cc
Oasis Medium	13 cm	11 cm	14.5 cm	1.2 L

Planting Instructions

- Before planting fill central well with coco-peat and press it to compact
- Planting:** Fit the black water tube into its connector and then place the plant into the pot and plant as usual- use of a soil- less media is highly recommended for all self-watering pots.
- Initially, water from the top, wetting the whole mass of growing media and allowing water to collect in the reservoir below. Repeat this procedure for next 3 - 4 watering. If the water comes out discolored, discard and clean reservoir cup.
- Subsequently, start watering through the watering tube. This way only clean fresh water will collect in the transparent reservoir cup.
- Fertilizers can be also added to the water in the reservoirs cup.

Multipurpose Trays are essential for a modern mass- production nursery, where they have numerous uses.

Table shows how many of different pots sizes a Multi-Purpose Tray will hold. Multipurpose Trays are designed to be used as a long lasting, no-corroding bench top - 3 rows of trays form a standard 165 cm wide (approx. 5 feet) nursery bench using GI pipe or MS angles as the supports.

Spacing Trays

- These are specially designed trays - their purpose being to space, hold and carry 11 cm & 13 cm pots
- These trays provide extra space between pots specially for tropical conditions
- Hold pots securely under windy conditions
- Handle, count and move 8 / 15 pots at a time
- Use on ground or easily form a bench using just two GI pipes per tray

CODE	LENGTH	WIDTH	HEIGHT	NO. OF POTS PER TRAY	POT SIZE
Spacing Tray # 2	79.5 cm	45.0 cm	7.5 cm	15	EU # 4, VDE 4 SIMILAR

- Heavy duty construction for years of use
- Auto air root pruning for bushy roots
- Grow up to 100 seedlings per sq foot of benching
- Deep cells give adequate soil for each size
- 5 inserts of any size fit into Multipurpose(MP) Tray
- Easy to place on benches, handling and carry into field
- Suitable for vegetable and ornamental seedling and cutting production

SIZES :

Small Cells (PP-200) : 200 cells per tray

Suitable for smaller seedlings such as Chinese cabbage, herbs, petunia etc.
Will give 100 plugs per sq. ft. of bench space.

Medium Cells (PP-150) : 150 cells per tray

Suitable for general purpose use such as lettuce, brinjal etc.
Will give 75 plugs per sq. ft. of bench space.

Large Cells (PP-100) : 100 cells per tray

Suitable for large vigorous seedlings such as tomato, watermelon, papaya etc.
Will give 50 plugs per sq. ft. of bench space.

Large growers of Exotic vegetables use our Perma Plug Trays from last 10 years. Simple benching keeps tray off ground and reduces disease.

Ornamental tissue-culture plugs - air pruning gives superior roots, allowing plugs to be pulled without using net pots.

WATERING WANDS

Advantages of Watering with a Wand

- Breaks up high pressure flow to give gentle shower
- Enables watering without washing out soil from pots, beds, etc.
- No reduction in water flow-allows fast watering
- Permits use of higher pressure pumps, which also speed up watering

Original Watering Wand

- Standard time tested design
- Sturdy Engineering plastic construction
- Built in filter

Laser Wands

- Hardened Stainless Steel Front Mesh can be opened for cleaning.
- Extra Uniform, soft flow from up to 1000 laser drilled holes.
- Blue Laser with regular holes & Red Laser with 1000 ultra fine holes;
- 3/4 inch hose fittings
- Junior models with small heads for low pressure residential systems, with 1/2 inch hose fittings.

Open Watering Wand

CODE	DESCRIPTION	HOSE
